

Injection Instructions for Prefilled Ovidrel

This medication comes in a prefilled syringe

With the needle pointing up, gently press on the plunger to remove the air pocket at the top

Flick on air bubbles to remove them (air bubbles will not hurt you)

Inject subcutaneously into the fatty tissue

Cleanse the area approximately 2 inches on either side of the navel with alcohol, let the alcohol dry (do not blow on it)

Take a pinch of fatty tissue

Hold the syringe like a pencil or a dart, the needle should be approximately 1 inch away from the skin, insert the needle quickly into skin (not hard but quick)

Let go of the pinch and inject the medication (it does not matter how quickly you inject the medication)

Remove the needle and place entire syringe into a sharps container
